CS 386 Software Engineering

Spring 2017

Prof. Gerosa

In this deliverable, we created a Trello board. From there we created a group for all of our cards. Next we created groups for the Backlog, To Do in the Current Release, Doing, and Done. From there, we simply put in cards based on what our users told us. We plan to use Trello to manage the rest of our project tasks. Here is an example of it below:
